We made more Revenue from cars with Very High Mileage but it is split between premium price and discounted price

Revenue By Condition

Cars with a good condition have generated the most revenue

Revenue By Price Type

We made trhe most Revenue from both the Discounted price and the Premium price

Business Recommendations

- Increase inventory allocation and marketing investment toward BMW vehicles, particularly the models that contribute most to revenue. Build stronger relationships with BMW suppliers and auction sources to ensure consistent stock availability.
- Prioritize the acquisition and promotion of automatic vehicles, as they appear to align more closely with customer preferences.
- Continue stocking high-mileage vehicles while implementing stricter quality inspections and transparent vehicle history reporting.
- Implement rigorous vehicle inspection and reconditioning processes before sale. Prioritize sourcing vehicles that meet good-condition standards and highlight condition ratings in marketing materials.

Business Recommendations 2

- Adopt a segmented pricing strategy:
 - Premium pricing for highly desirable vehicles (strong brand, low competition, good condition).
 - Strategic discounts for aging inventory, high-mileage vehicles, or slower-selling models.
